- JavaScript, Node.js, React, Redux, React Native, Express, Python, HTML5, CSS, AWS, Debugging, Deployment, RESTful API, PostgreSQL, Sequelize, Bootstrap, Flexbox, English-Fluent, Spanish-Fluent, Microsoft Office, Accounts Payable, Accounts Receivable, Accounting GAAP, Financial Forecasting, Balance Sheet Reconciliation

Software Development Projects

Wiser-Chat | <https://wiser-chat.netlify.app/> | <https://github.com/andresicedo/wiser-chat>

April 2021

- A chat application that utilizes sockets to communicate between client and server in realtime. The application also uses the Google Translation API to translate all chat room messages to the user's preferred language.
- Create a username, designate a chatroom, select a language preference and begin to chat. I created the application with the intention of being able to converse with someone of a different language without having to go and translate what the person is saying, after the fact.
- The application was built using Node, React, Express, Socket.io, and Google Translation API. Deployment of the application is through Netlify for the frontend and Heroku for the backend.

Scenelt | <https://sceneit.us/> | <https://github.com/andresicedo/scene-it>

April 2021

- This is an application which allows a user to search for any movie or show and save results into their favorites. This application uses an API to fetch movie data from the IMDb search engine.
- This front-end application was built using React with Bootstrap and Swiper JS frameworks for styling and functionality.

BulbNotes | <https://github.com/andresicedo/bulb>

April 2021

- Member of a 3-person development team, building a note-taking website where users can take notes and reference them with a label for a collection of notes on the same subject.
- Responsibilities included designing and assembling a fully responsive web layout, routing information being passed from the database and establishing database entity relationships.
- This application was built using Node, Express, PostgreSQL, Javascript, HTML5 and CSS3.

Professional Work Experience

DigitalCrafts | Software Engineering Student

January 2021 – April 2021

- Acquired in-demand software technologies through daily lectures and creating web applications
- Used branching, merging, and pull requests to distribute work among team members on 3 major class projects
- Resolved code conflicts and fixed bugs through pair programming among teams of 4

Marriott International | Sr Assistant Director of Finance

May 2012 – October 2020

- Led an accounting team of 15+ in successfully supporting daily hotel operations in resort and city hotel capacities of 1000+ rooms and convention centers
- Provided meaning/context to financial results during monthly P&L critique meetings to 25+ hotel leaders for 3 years

Education

• **DigitalCrafts** | Certificate in Software Engineering

January 2021 – April 2021

• **Sam Houston State University** | Bachelor of Business Administration

August 2011 – May 2015
